Project Overview

● ● ● ● ● ● ● ● ● ● ● ● ● ●

COVID-19, or Coronavirus Disease 2019, is a highly contagious illness caused by the novel coronavirus SARS-CoV-2, first identified in Wuhan, China in late 2019. The disease rapidly spread across the globe, leading the World Health Organization (WHO) to declare it a pandemic in March 2020.

Intorduction

● ● ● ● ● ● ● ● ● ● ● ● ●

A COVID-19 project introduction will typically highlight:

- The origin and causative virus of COVID-19.
- How the disease spreads and its main symptoms.
- The worldwide scale and historical significance of the pandemic.
- Key public health measures and technological innovations to combat the outbreak

OBJECTIVE AND KEY FEATURES

Public health objectives focused on testing, tracing, contact identification, and preventive measures, such as mask-wearing, hand hygiene, and social distancing, to limit spread.

- **Common symptoms: fever, cough, fatigue, loss of taste or smell.**
- **Variable incubation period: Symptoms typically start 1–14 days after exposure.**
- **Diagnosis is based on clinical symptoms, laboratory testing, and radiological findings**

Do Gaj Ki Doori, Mask Hai Zaroori"
(Two yards distance, mask is necessary)
This simple rhyme reminded people of the importance of social distancing and mask-wearing in daily life.

WE PROVIDE
BEST MEDICINE

Covishield is authorized for use in adults and is not currently recommended for children, pregnant women, or breastfeeding mothers due to limited safety data in these groups. Vaccination with Covishield .
 The vaccine is given in two doses, usually 4 to 12 weeks apart, with optimal efficacy achieved when the second dose is given 8 to 12 weeks after the first. Studies report its efficacy at about 76% to 81% in preventing symptomatic COVID-19 after the full two-dose course. It also helps reduce the severity of illness in breakthrough infections.Covishield is a COVID-19 vaccine developed by AstraZeneca and the University of Oxford and manufactured in India by the Serum Institute of India.

PROBLEMS

Psychological Problems: Lockdowns and re.strictions on movement increased loneliness, anxiety, depression, and stress. People worried about their future and felt a loss of control over their lives. Healthcare workers experienced especially high levels of stress and fear.

Health Problems: COVID-19 caused millions of illnesses and deaths worldwide. People experienced symptoms ranging from mild (cough, fever, fatigue) to severe (difficulty breathing, organ failure), and some developed long-term issues known as "long COVID". Access to routine medical care was also disrupted

INDUSTRY CONTRIBUTIONS

Presentation are communication tools that can be used as demontrations, lectures, reports, and more. It is mostly presented before an audience.

Technology : Companies specializing in online collaboration tools (such as videoconferencing and project management software), cloud computing, and IT infrastructure saw massive growth. The shift to remote work made these services essential for businesses to maintain operations during lockdowns

E-commerce and Delivery Services: The pandemic accelerated the shift from in-store to online shopping and greatly increased the demand for both product and food delivery services. With physical stores closed or restricted, consumers relied more on platforms like Amazon and food.

Healthcare and Health Tech: The healthcare industry, including telehealth, pharmaceutical, medical supplies, and health IT, experienced strong growth. With increased demand for online medical consultations, personal protective equipment, and rapid adoption of health information technology, this sector expanded rapidly.
